Education

University of Pennsylvania

12/2025

M.S.Ed in Learning Sciences & Technologies

Philadelphia, PA

Relevant courses: Product Management, Engineering Entrepreneurship, Learning Analytics, Design of Learning Tools, Instructional Design

Carnegie Mellon University

12/2020

B.Arch with Minors in HCI & Media Design

Pittsburgh, PA

Relevant courses: Programming, Human-Centered Software Design, Interaction Design, Data Visualization, AI Design for Long Term

Work Experience

Journey Sparks (Vivra, Inc.)

09/2025 - Present

Founder & Product Manager

Philadelphia, PA

- Built and launched MVP of an AI-powered learning app ("Journey Sparks") in 4 weeks using Cursor AI and Figma iterating through 3+ major cycles, transforming daily physical exploration into 20-minute personalized curiosity-driven learning experiences.
- Conducted user research and rapid user testing with 10+ users, identifying onboarding and engagement friction points and translating findings into product requirements such as integrating an AI personalization system with Gemini API prompt engineering.
- Defined product roadmap, feature scope and prioritization across 5 core features (personalization, onboarding, location-awareness, progress tracking with data storage) based on user value and technical feasibility.

Amplify Education

06/2025 - 08/2025

Literacy Product Management Intern

Brooklyn, New York

- Led 0-1 development of "Weekly Writer", a writing assessment product for 3.3M CKLA students across Grades 3-5, enabling scalable weekly writing student workflows and more consistent writing literacy progress tracking for teachers and school districts.
- Defined MVP scope, success metrics, and pilot roadmap, leading cross-functional development and alignment across 6+ functions (engineering, UX, data science, curriculum designers, customer success, leadership).
- Conducted 10+ educator interviews, usability testing, and rapid workflow prototyping in Desmos and Figma to identify workflow friction points, validate product direction, and translate platform constraints into prioritized engineering improvements.
- Led Teacher Dashboard Redesign Project using Figma. Analyzed 10+ churn interviews to identify key gaps between teacher usability and actionability, improving learning progress visibility and enabling actionable next steps for teachers based on churn insights to support retention and improve weekly teacher engagement in the following school year.
- Aligned 8+ stakeholders on defining student growth and feature prioritization via a "Crazy 8s" design workshop.

University of Pennsylvania Undergraduate Admissions Office

08/2024 - 12/2025

Graduate Assistant

Philadelphia, PA

- Led 0→1 development and launch of "College App Classroom," a 5-module college readiness product (28 lessons) delivered across 10+ partner schools and impacting 400+ students, leveraging Qualtrics survey analysis, 10+ focus groups, and value-effort prioritization frameworks to translate user insights into scalable product improvements and drive cross-functional execution across design, outreach, and nonprofit stakeholders.

Corgan

07/2021 - 05/2024

Project Coordinator

Dallas, TX

- Led end-to-end coordination and delivery of 10+ large-scale projects and supported 50+ concurrent initiatives, managing multi-month to multi-year timelines while balancing scope, risk, resource constraints, and cross-functional stakeholder priorities across clients, engineers, internal teams, permitting offices, and contractors.
- Drove stakeholder alignment and operational efficiency through structured project documentation, workflow optimization, and process improvements, translating ambiguous client requirements into actionable execution plans that contributed to ~30% of team revenue and ~90% design approval rates.

Skills & Domains

- Tools: Figma, FigJam, Adobe Suites, Miro, Jira, Notion, Google Analytics, Tableau, Qualtrics, SQL
- Technical: HTML/CSS/JavaScript, Firebase, API integration, AI-assisted development (Cursor, Claude Code, Gemini)
- Domains: EdTech, Architecture/Construction Tech
